

- **What is NFTPrime?**

NFTPrime is the pioneer NFT platform in Turkey enabling the users to create value and invest by buying and selling NFTs in the ecosystem. The marketplace has given the opportunity to register many artworks and design digitally created or converted from physical to digital in blockchain network. The "singularity" and "uniqueness" of each NFT makes the creator or collector to make trading easily and fast. NFT Prime is a San Francisco based NFT Marketplace company and first Turkish marketplace on Avalanche blockchain.

- **Which Blockchain Network is preferred by NFT Prime? Why?**

NFTPrime marketplace is on Avalanche blockchain. Avalanche is the fastest smart contracts platform in the blockchain industry. It takes 2 seconds for a transaction. It is scalable. It has the lower costs in the industry than other blockchain networks have. It is an Energy Efficient network. It's green and clean.

- **How can I sign in NFT Prime?**

You just need a Metamask wallet and connect it to marketplace. You don't need to sign in, connecting wallet would directly create an account for you

- **What is Minting?**

Minting is the process of creating and registering a digital artwork onto the blockchain through a "proof of stake" protocol.

- **What are the selling methods in NFTPrime ? How can I sell an NFT?**

There are two methods to sell an NFT on NFTPrime. First method is setting a fixed price for your NFT and put on sale. Or you can set an auction with a starting price and buyout price in a period defined by you. The buyers would place competitive bids on your NFT until the end date and time. At the end of the auction, NFT is sold to the buyer who would pay most. The buyer is treated fairly and you are able to sell NFT on a timely basis on a secure platform.

- **How can I create an NFT?**

You have to create a collection first before creating an NFT. You should connect your wallet and then press "Create" button to create a collection. Then you can follow instructions and register your artwork on blockchain network. Creating is minting.
